Achievement

Online Hotel Management System

Case study of Online Hotel Management System developed using ASP.NET Core ,Web API Core ,SQL Server Management Studio and UserInterface created with HTML5,CSS3 and Angular. JWT authentication was used for user authentication purposes. It is a web application whose end user is the owner of the hotel and certain staffs like manager and receptionist of the hotel. This web application is meant to automate major operations of the hotel including functionalities like keeping track of all the rooms and their availability status, inventory details and the list of guests residing in those rooms.
